

ENVIRONMENTAL POLICY

Framework

Engie Renováveis Portugal, SA operates in a world where environmental issues and concerns are multiplying. Risks related to climate change, overexploitation of natural resources, loss of biodiversity, and air pollution are central concerns for the ENGIE Group. The environment is one of the main concerns of Engie Renováveis Portugal, guided by the highest ethical standards in this matter, consistently promoting them within the Organization and among those who operate with it.

Engie Renováveis Portugal, SA's commitments

Engie Renováveis Portugal is committed to identifying its environmental aspects and impacts, implementing necessary measures to avoid, reduce, and, if necessary, compensate for them, managing the resources at its disposal in an optimized manner. To this end, it undertakes to rigorously comply with the commitments listed below:

- Establish environmental protection as a priority, preventing and mitigating the effects of its activities through the identification and assessment of its environmental aspects and impacts, extending this commitment to its business partners, particularly but not exclusively in the areas of waste management, hazardous substances management, emergency preparedness and response, biodiversity, and climate change;
- Promote the improvement of the company's environmental performance through continuous improvement of its integrated environment and safety management system;
- Comply with legal environmental requirements and other obligations to which it has committed, adhering to the rules established by the ENGIE Group and influencing its partners to act similarly;
- Provide training and awareness, as well as all necessary resources for the execution of activities;
- Seek to develop its activities in accordance with the best available environmental practices.
